## **Encourage Young People to Pursue a Technical Career!**

The free 2008 Structural Engineering Posters are now available! Help us promote Structural Engineering as a profession to young people by distributing the posters to the office of a college guidance or career counselor and/or math or science teachers at the middle and high school levels. The intent is to increase young people's awareness of structural engineering as a career by featuring different aspects of the profession that might appeal to them.

The posters are a joint project of SEI and NCSEA and it's our hope that young people will be inspired by the structures shown in each year's poster. If you'll let us know how many you want, we'll ship to you free of charge, and thank you for your help.

The 2008 poster is available in two colors - [orange](#) or [green](#). To get your copy(s) of the free 2008 poster, contact [Linda Delahay \(lsdelahay@pobox.com\)](mailto:Linda.Delahay@pobox.com). Supplies are limited.

Our hope is that these posters can be displayed in a visible place to help students see how important their studies are and to encourage them to consider a career in structural engineering.
